WHAT IS PILPED FOR FISH ? WHAT IS IT USED FOR?

- ▶ The size of PILPEDforFISH is 15x25 cm. It can absorb more than 700 ml icy water in less than 10 minutes.
- ▶ The absorbant core of the pad consists of cellulose and SAP. The materials that we use in our production are all appropriate to international food safety regulations.
- ▶ The materials used at top and bottom side of the pad are nonwoven material, appropriate to international food safety regulations.
- ▶ We produce according to the HACCP principles under the permission of Ministry of Agriculture of the Republic of Turkey.
- ▶ We can produce tailor made products. Tell us what you need and we produce it.

FREQUENTLY ASKED QUESTIONS

Your products are in contact with food. How can you be sure that they are hygienic?

We have “FOOD SAFETY CERTIFICATIONS” from all our suppliers.

In our absorbant pads, we use a special type of SAP (super absorbant polymer) that can be used with nutrients. It's more costly but health always comes first.

We have every necessary FOOD SAFETY certification. The certifications are approved by the Ministry of Agriculture of Republic of Turkey.
